## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Von Gutfeld (U.S. Patent No. 6,219,126).

Von Gutfeld discloses the method and the device as claimed including the steps of providing an upper plate (2a) and a lower plate (1a), forming a protrusion (3) between a sealing area (peripheral portion) provided with a sealant and a picture display area (central portion) on one of the upper and lower plates, forming the sealant (see column 4, lines 10-20) on one of the upper and lower plates, forming a liquid crystal layer (see column 4, lines 2-5) on one of the upper and lower plates using a liquid crystal dispensing method, and joining the upper plate with the lower plate (see column 4, lines 20-25).

Von Gutfeld further discloses the method wherein the sealant (2b) is formed on one of the upper and lower plates and the protrusion (3) is formed on the other one of the upper and lower plates, and wherein the sealant (2a) and the protrusion (3) are formed on the same one of the upper and lower plates.
